Q2 Commentary

The Athens Stock Exchange recorded a +8.6% return in the first half of the year following the impressive performance of 2023. However, the market remains attractive, trading at 8.1x (P/E) the estimated 2024 earnings and 7 times EV/EBITDA. The Greek economy consistently produced primary surpluses and maintained positive growth at 2%, while corporate profitability remained strong, driving market momentum. The banking sector recorded a return of +14.3% in the first half of 2024, anticipating the completion of privatizations by the Hellenic Financial Stability Fund (HFSF) and the first dividend distributions in 12 years. The Triton Growth Equity Domestic Fund delivered a +7.92% return, underperforming the index by 67 basis points.

Key risks

The Mutual Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Mutual Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

Investment risks

Risks from the Sub-Fund's techniques and securities

Market	Liquidity	Derivatives (Leverage)	Single Region/Country Risk:
The fund is subject to normal market fluctuations and the risks associated with investing in securities markets. The value of your investment and the income from it may be affected by general economic and political factors as well as industry or company specific factors.	The fund operates in a market characterized by low trade volumes and securities that may become illiquid. This results in a higher risk of losses due to reduced trading speed/efficiency and sharper price fluctuations.	The derivatives market introduces significant levels of complexity, increasing the probability of adverse gains or losses to the fund that holds derivatives. The higher sensitivity to price movements of the underlying asset can asymmetrically affect the price of a derivative that is linked to it.	As the Fund is a specialized country-specific or geographical regional fund, the investment bears more risk than a more globally diversified portfolio.
