

Monthly Summary Report: **30 September 2024**

Summary Risk Indicator

Lower Risk ← Higher Risk

The risk indicator is based on the assumption that you will hold the product for the recommended period of 3 years.

Investment Objective

To provide investors with income and long-term growth of capital. The Fund combines a global, value-based selection approach with a multi-asset allocation strategy, unrelated to benchmark constraints. The Fund is actively managed relative to the benchmark.

Investment Strategy

The Fund focuses on a portfolio of equities and bonds. The strategic allocation is characterized by flexibility and selectivity based on the disciplined analysis of fundamental data. In times of market uncertainty the Fund can maintain higher cash levels in order to protect its performance

Fund Details

Fund Size (M):	€ 32.293
Net Unit Price:	€ 11.6930
Inception Date:	30/9/1994
Licence Nr. Gov. Gazette B'	675/08-09-1994
Benchmark:	Blended Index
Base Currency:	Euro
ISIN:	GRF000090008
Bloomberg Ticker:	HSBCGRB GA
Minimum initial Investment:	€ 1,500
Commission: Subscription up to	0.30%**
Commission: Redemption	0%
Management Fee: up to	1.25%

**Commissions negotiable according to the official commissions pricelist posted on www.triton-am.com

Performance fee

Up to 15% on any positive difference between the performance of the NAV per unit and the performance of the Blended Index

From 01/01/2022 the performance fee will be calculated and paid, if an outperformance has been achieved relative to the benchmark even in periods of negative returns, while it will not be calculated or paid if it underperforms relative to the benchmark, even in periods when the return on the Fund is positive

The performance fee is calculated in accordance with ESMA's guidelines on performance fees in UCITS and certain types of AIFs (34-39-992) as they have been applied and incorporated into the supervisory framework of the Hellenic Capital Market Commission from 1/1/2022.

Q3 Commentary

The third quarter of 2024 witnessed notable developments in the global financial markets, marked by strong performances in both equities and bonds, amid shifting macroeconomic conditions. U.S. equity markets continued to rise, buoyed by a mix of sector rotation and broad participation. The S&P 500 gained 5.25% in Q3, contributing to a year-to-date return of over 22%. Bond markets benefited from the shift in interest rate policy. The Barclays Global Aggregate Index returned 7.47% in Q3, while U.S. Treasuries gained 4.7%. While gold reached new highs as investors sought safe-haven assets, oil prices saw a sharp decline, with Brent crude falling 17%, primarily driven by concerns over the global economic outlook. The Federal Reserve, after a long period of rate hikes, finally began easing monetary policy, reducing rates by 50 basis points. This move was mirrored by other central banks, including the European Central Bank and the Bank of England, which also cut rates to support their economies. The shift in rate expectations led to positive bond performance and helped calm fears of a significant economic slowdown. As we head into the final quarter of the year, the key themes for investors include navigating a late-cycle economy, potential volatility due to upcoming political events (such as the U.S. elections), and the continued adjustment to lower interest rates. Diversification and rebalancing portfolios remain critical strategies, given the high valuations in some sectors. Overall, Q3 2024 was characterized by resilience in the face of macroeconomic headwinds, with most asset classes generating strong returns amidst the anticipation of more supportive monetary policy. In this context, TRITON Balanced fund achieved a performance of +2.94% at 30/9/24, while the benchmark index reached +8.12% for the same period.

Key risks

The Mutual Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Mutual Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

Investment risks

Risks from the Sub-Fund's techniques and securities

Credit	Liquidity	Counterparty	Derivatives (Leverage)
An important part of the investment is held in debt securities, which are characterized by strong asymmetry of returns. They combine the probability of small return from the interest rate fluctuation with the probability of loss much of the investment due to inability to meet obligations of the issuer.	Attempting to liquidate a security in a market where there is no corresponding demand, it may cause large fluctuations at the price of the title. Highly traded securities pose less risk liquidity.	The fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.	The market risk in derived products is larger and more complex. The big price volatility of a derivative financial instrument due to the fact that a small movement in the price of the underlying security, index, can lead to a significant move in the price of the derivative instrument.
