

Quarterly Summary Report: 31 December 2024

### Summary Risk Indicator

Lower Risk ← Higher Risk

The risk indicator is based on the assumption that you will hold the product for the recommended period of 3 years.

### Investment Objective

To provide investors with income and long-term growth of capital. The Fund combines a global, value-based selection approach with a multi-asset allocation strategy, unrelated to benchmark constrains. The Fund is actively managed relative to the benchmark.

### Investment Strategy

The Fund focuses on a portfolio of equities and bonds. The strategic allocation is characterized by flexibility and selectivity based on the disciplined analysis of fundamental data. In times of market uncertainty the Fund can maintain higher cash levels in order to protect its performance

### Fund Details

Fund Size (M):	€ 30.355
Net Unit Price:	€ 11.7150
Inception Date:	30/9/1994
Licence Nr. Gov. Gazette B' 675/08-09-1994	
Benchmark:	Blended Index
Base Currency:	Euro
ISIN:	GRF000090008
Bloomberg Ticker:	HSBCGRB GA
Minimum initial Investment:	€ 1,500
Commission: Subscription up to 0.30%**	
Commission: Redemption 0%	
Management Fee: up to 1.25%	

\*\*Commissions negotiable according to the official commissions pricelist posted on [www.triton-am.com](http://www.triton-am.com)

### Performance fee

Up to 15% on any positive difference between the performance of the NAV per unit and the performance of the Blended Index

From 01/01/2022 the performance fee will be calculated and paid, if an outperformance has been achieved relative to the benchmark even in periods of negative returns, while it will not be calculated or paid if it underperforms relative to the benchmark, even in periods when the return on the Fund is positive

The performance fee is calculated in accordance with ESMA's guidelines on performance fees in UCITS and certain types of AIFs (34-39-992) as they have been applied and incorporated into the supervisory framework of the Hellenic Capital Market Commission from 1/1/2022.

Fund Performance	As of 31/12/2024			Full Calendar year

ASML HOLDING	2.24%
VONOVIA SE	2.17%
PEPSICO INC	2.17%

DERIVATIVES 22.29%

### Q4 Commentary

International financial markets recorded strong performance in 2024, driven by global monetary easing and progress in the technology sector. In the United States, equity indices rose significantly, with the S&P 500 index increasing by 23.31%, led by technology companies in the artificial intelligence sector. In Europe, markets achieved steady growth despite geopolitical uncertainties, with the green energy and technology sectors standing out. In Asia, most markets moved upward in 2024, but concerns over trade tensions with the U.S. recently led investors to liquidate stocks. Bond markets benefited from global monetary easing, as interest rate cuts in major economies caused government bond prices to rise and significantly increased corporate bond issuances. Investment-grade bonds outperformed, while high-yield bonds recorded gains, although concerns grew over the high leverage in certain specific sectors. In this context, the TRITON Balanced Fund achieved a return of +3.14%, while the fund's benchmark index recorded a return of +11.27% during the same period.

**Key risks**

The Mutual Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Mutual Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

**Investment risks**

Risks from the Sub-Fund's techniques and securities

Credit	Liquidity	Counterparty	Derivatives (Leverage)
An important part of the investment is held in debt securities, which are characterized by strong asymmetry of returns. They combine the probability of small return from the interest rate fluctuation with the probability of loss much of the investment due to inability to meet obligations of the issuer.	Attempting to liquidate a security in a market where there is no corresponding demand, it may cause large fluctuations at the price of the title. Highly traded securities pose less risk liquidity.	The fund could lose money if an entity with which it does business becomes unwilling or unable to honor its commitments to the Sub-Fund.	The market risk in derived products is larger and more complex. The big price volatility of a derivative financial instrument due to the fact that a small movement in the price of the underlying security, index, can lead to a significant move in the price of the derivative instrument.
