

# 20UGS (UCITS) FUNDS

## Triton (LF) Greek Equity (Class A)

UCITS SICAV

Quarterly Summary Report: 31 March 2025

### Summary Risk Indicator

Lower Risk Higher Risk

The risk indicator is based on the assumption that you will hold the product for the recommended period of 5 years.

### Investment Objective

To provide investors with long term capital appreciation by investing primarily in Greek equity securities and secondarily in other securities. The Fund is actively managed relative to the Benchmark.

### Investment Strategy

The Sub-Fund invests, in a percentage of at least 65% of its net assets, in equity securities and other equivalent securities of companies admitted and dealt in the Athens Stock Exchange and companies which are established in Greece but admitted to any other official listing or dealt in other regulated market as well as companies with significant operations or carrying out a sizeable part of their business activities in Greece.

### Q1 Commentary

During the first quarter of 2025, the Greek stock market recorded an impressive performance, rising by 14.67% — one of the best performances historically since 2000 and among the top globally. The rally was mainly driven by the exceptional performance of the banking sector, which delivered a return of 23.4%, following the positive momentum of European banks. However, in recent days, the market has completely reversed direction, posting losses from its highs due to growing concerns about global trade. The upward trend of the first quarter appears to have been driven primarily by a revaluation of valuations rather than earnings growth, as corporate announcements and outlooks offered few surprises. The Greek market continues to trade at a significant discount compared to the Stoxx 600 and the MSCI EM based on the price-to-earnings ratio (P/E). This suggests there is substantial room for further revaluation, especially as macroeconomic and microeconomic risks continue to recede. The General Index had a positive return of +14.67% for the first quarter of 2025, while Triton (LF) Greek Equity (Class A) recorded a return of +13.93%, underperforming the index by 0.73%.

## Key risks

The Sub-Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Sub-Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

## Investment risks

Risks from the Sub-Fund's techniques and securities

Market	Liquidity	Derivatives (Leverage)	Concentration
The fund is subject to normal market fluctuations and the risks associated with investing in securities markets. The value of your investment and the income from it may be affected by general economic and political factors as well as industry or company specific factors.	The fund operates in a market characterized by low trade volumes and securities that may become illiquid. This results in a higher risk of losses due to reduced trading speed/efficiency and sharper price fluctuations.	The derivatives market introduces significant levels of complexity, increasing the probability of adverse gains or losses to the fund that holds derivatives. The higher sensitivity to price movements of the underlying asset can asymmetrically affect the price of a derivative that is linked to it.	Mutual funds with concentrated investment policy may be exposed to higher risk, higher volatility and lower liquidity from mutual funds with less concentrated portfolio.

TRITON (LF) GREEK EQUITY IS A SUBFUND OF 20UGS (UCITS) FUNDS, A SICAV REGISTERED UNDER PART I OF THE LUXEMBOURG LAW ON COLLECTIVE INVESTMENT UNDERTAKINGS (UCITS-IV) OF DECEMBER 17, 2010
